Drums, PA 18222)

9AM-3PM

2012 FARMERS WINTER MEETING

WEDNESDAY JANUARY 25, 2012

LUZERNE CONSERVATION
DISTRICT

Who needs a Manure Management Plan?

Every farm in Pennsylvania that land applies manure or agricultural wastewater (generated on the farm or received from an importer). This includes manure and agricultural process wastewater application by various types of equipment and/or direct application of manure by animals on pastures and in Animal Concentration Areas (ACAs). In other words, farms that do not mechanically apply manure but which do have pastures or ACAs still need a manure management plan.

The benefits of manure management planning besides meeting state requirements are:

- getting the most out of your manure
- Improved water quality on your farm
- Potential to increase yields
- Increase soil health
- Decrease fertilizer costs

Who needs an Ag Erosion and Sedimentation Plan? (Conservation Plan)

Any operation that does plowing or tilling including no-till over 5,000 square feet and/or has bare areas caused by animals congregating needs to develop and maintain an Ag E&S plan.

First 15 to register get a
free Agronomy Guide
A \$16.00 value

AGENDA

PESTICIDE
CREDITS
AVAILABLE

9AM What's New in Agriculture
Donovan Houck PA DEP-Chapter 102 regulation update
Peter Tarby PA DEP-Manure Management Plan

10:30 MMM Work-session

12PM Catered Lunch by White Haven Bakery
